

Our Day At Blackpool Zoo

Our Science Trip to Blackpool Zoo was one to remember for all of the year 7s. It was a nice hot day and we had great fun. We went on Friday 26th June, we left at 9.00am and arrived back at 5.00pm.

We all studied adaptations of different animals to their habitats. When we came back we did presentations about this. We also went around the zoo and filled in a work book. It was really hot and none of us were that prepared for it as we all brought rain coats and umbrellas! Even though we were all boiling hot we had a fantastic time and I hope everyone else enjoyed it too.
