Food for Life: Yr 7 Potato Growing Competition

Last March Year 7 planted seed potatoes in the small garden plot by Technology. Each form elected a team to plant the 8 seed potatoes each. Since then they have banked up the plants and weeded the plot. On Wednesday, 8th July they dug up their crop. They produced a magnificent 12Kg of potatoes of all shapes and sizes. 7K produced the most with a crop of 4Kg!! 7L produced the heaviest potato, weighing 300g. Half the potatoes will be used in the meals offered in the canteen this week. The other half were taken home by the team members so that they could enjoy their own grown potatoes.
